

## Social media security

- Make sure you know who can see your social media profiles. Most social media platforms offer the option to choose who can see your content.
- Avoid sharing personal information that is not necessary to share. Check every post and account for sensitive information.
- use complex and strong passwords to ensure security on your social media accounts.
- Make sure the social media pages you use are secure and trustable. Prefer popular sites and apps that contain documentation about the app.
- use multifactor authentication to ensure that nobody can access your social media accounts.
- Do not agree to share personal information in social media sites.
